make:able

Media consent form

PrintLab International Ltd is a UK-based company that develops 3D printing educational resources for schools, libraries and other organisations.

In collaboration with Autodesk, we organise Make:able, a free, year-round challenge where participants design and make 3D-printed assistive devices to improve the lives of people with disabilities.

We are therefore seeking your consent to process and use information and media relating to you, including photographs and videos in which you appear. Please tick the relevant boxes below to indicate the activities you consent to, before completing and signing the form.

I consent to information, images and/or video footage of myself being included in a Make:able Challenge submission. I understand that these materials will be viewed by the Make:able organisers and judges for the purposes of reviewing and evaluating submissions. ☐

I give permission for PrintLab International Ltd and its Make:able Challenge partners (listed on the Make:able website) to share information, images and/or video footage of myself to celebrate and promote Make:able. This may include use on websites, social media, newsletters, future Make:able toolkits and other educational or promotional materials. ☐

I, _____ (print full name) have read this form and hereby consent to the above ticked activities.

Signed: _____

Date: _____
