make:able

Parental consent form

PrintLab International Ltd is a UK-based company that develops 3D printing educational resources for schools, libraries and other organisations.

In collaboration with Autodesk, we organise Make:able, a free, year-round challenge where participants design and make 3D-printed assistive devices to improve the lives of people with disabilities.

We are therefore seeking your consent to process and use information and media, in relation to your child or the child whom you are the legal guardian to. Please tick the relevant boxes below, which indicate the activities you consent to, before filling in and signing the form details.

I consent to information, work, images and/or video footage of my child being included in a Make:able Challenge submission. I understand that these materials will be viewed by the Make:able organisers and judges for the purposes of reviewing and evaluating submissions. ☐

I give permission for PrintLab International Ltd and its Make:able Challenge partners (listed on the Make:able website) to share my child's work, images and/or video footage to celebrate and promote Make:able. This may include use on websites, social media, newsletters, future Make:able toolkits and other educational or promotional materials. ☐

I, _____ (print full name) have read this form and hereby consent to the above ticked activities in relation to my child, _____ (print full name of child).

Signed: _____

Date: _____
